"We needed to upgrade our facility to provide modern, safe, and educationally-effective science and engineering labs, as well as provide a theater with a legitimate stage and production features," says Jim Piatt, Principal of Brown Deer High School in Brown Deer, Wisconsin. "Plunkett Raysich Architects suggested we give CJ & Associates a call. Their bid was competitive and their expertise in layout and furniture and equipment options was very extensive."

"I coordinated all aspects of the project, from initial discussions with the architect, through sample presentation and design services to complete installation," says Pete Sotiros, Sales Manager from CJ & Associates, Inc. "Our main objective was to update the room décor and furniture as it hadn't been done for decades."

"CJ remodeled an old auditorium/ lecture hall into four new science labs," says Piatt. "They also upgraded a fifth science lab, converted two classrooms into and engineering lab, and remodeled an auxiliary gym into a new auditorium. "

"Despite time and cost constraints, we used our expertise to help Brown Deer High School meet both," says Sotiros. "We were flexible with the installation so that there were minimal disruptions while classes were in session."

"I was very pleased with the knowledge and service provided by CJ and Pete Sotiros." Says Piatt, "I would definitely use their services again and recommend them to anyone looking for those types of services."
